

SLED

A ProSolve Experience

Where Students Lead Real Change

3RD – 12TH GRADE

A **STUDENT-LED** program where students discover real problems, build real solutions, and develop the human skills that define success in an AI-driven world.

Leadership Through Real World Action

SLED puts students in charge. They identify real challenges in their school and community, use design thinking to build solutions, and take action that creates visible impact. Every project builds the human skills AI can't replace: adaptability, creative thinking, collaboration, and the confidence that only comes from real-world application.

Scripted Lesson Guides

Dedicated program advisor for your facilitator

Rank Incentives earned through Badges and Points

Motivational Loot Boxes unlocked to celebrate milestones

Student-led projects with real impact

Where SLED Fits in Your Day:

SCHOOL DAY
Use during advisory time, CTE courses, or leadership programs to build human skills alongside academics.

EXPANDED LEARNING
Spark attendance and belonging for summer and afterschool programs.

INTERVENTION
Re-engage students while supporting your attendance recovery goals.

Student Voice. Human Skills. Real Engagement.

When students own their learning, they show up differently. More curious, more committed, and ready to lead.

1 Measurable School Impact

The SLED dashboard tracks projects, badges, ranks, and outcomes—giving schools clear proof of leadership growth, community impact, and human skills in action.

51% → 80%
Students demonstrated greater enjoyment of school

2 Community Impact

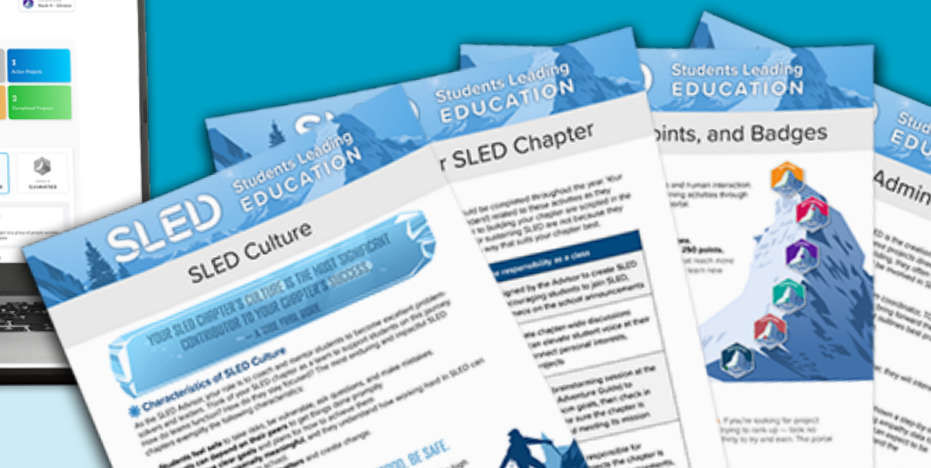

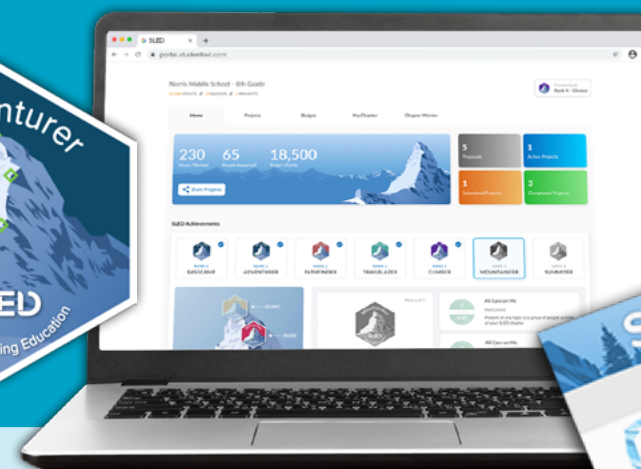

Students lead real projects, build trust, and improve their school community—driving stronger engagement, deeper belonging, and leadership

155K
people were impacted from student projects

3 Easy to Implement

Turnkey lessons, ready-to-use materials, and a dedicated Trail Guide make SLED easy to launch and run.

98%
of facilitators felt confident and prepared to implement SLED with ease

ProSolve

The Human Skills Company

Meet the human skills company.

ProSolve's mission is to ensure humans stay relevant in an AI-powered world by making human skills visible, measurable and actionable.

Human skills don't develop in isolation. Our framework is intentionally organized to show how 12 core skills connect and how growth in one area fuels growth in another.

Start Your SLED Chapter!

Bring student leadership to life with real projects, measurable growth, and built-in support.

One ecosystem. One shared outcome.

ProSolve partners with districts to define, measure, and develop the human skills that matter most.

1

STRATEGIC DIRECTION

Clarity and alignment through thought leadership, Portrait of a Graduate development, skill progressions, shared language, and supported professional learning.

2

ASSESSMENT & REPORTING

The first benchmark assessment for human skills, providing objective data aligned to SEL, the 4Cs, and Portrait of a Graduate, used for MTSS and accountability.

3

CURRICULUM & PROGRAMS

Easy-to-implement, play-based experiences that grow human skills across the school day, enrichment, and SEL instruction.

Together, ProSolve moves districts from vision to evidence to measurable growth with systems that make human skills visible, actionable, and impactful.
