

APEX ACADEMY

Welcome to QUEST: Apex Academy

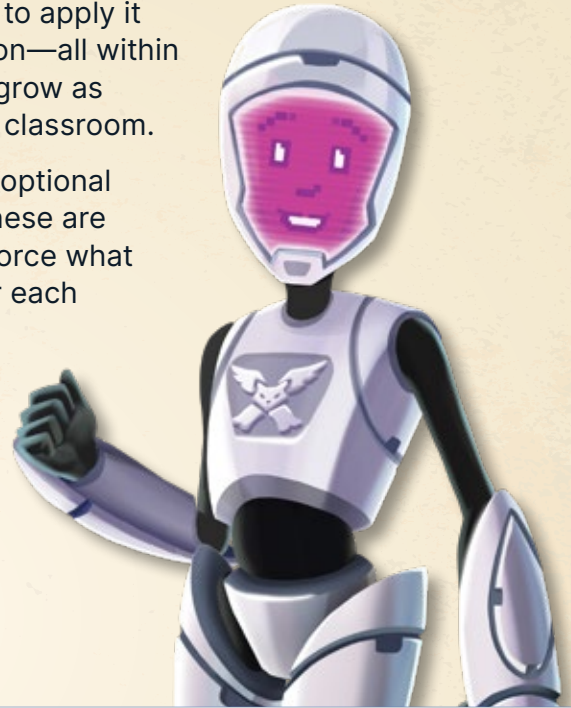

This year, your child will take part in **QUEST: Apex Academy**, a hands-on learning adventure focused on building human skills that matter in school and life.

Through story-driven lessons and collaborative team challenges, students practice skills like critical thinking, communication, collaboration, perseverance, and self-awareness. Each unit focuses on one skill and gives students the chance to apply it through problem-solving, decision-making, and reflection—all within the world of Apex Academy. These skills help students grow as thinkers, teammates, and leaders both in and out of the classroom.

At times, your child will bring home **Side Quests**, short, optional activities that connect classroom learning to real life. These are not homework, but simple and meaningful ways to reinforce what your child is learning in class. You'll receive a brief letter each time a Side Quest is introduced.

At QUEST, we believe:

- Students learn best by doing, not just listening.
- Reflection deepens learning.
- Mistakes are part of growth.
- The best questions don't have simple answers.
- Real-world challenges build real-world skills.

We encourage you to stay connected to your child's learning by asking about their QUEST experience. Try these conversation starters:

Who are the members of your QUEST team and what do you like about them?

What is fun about working with your team? Is there anything challenging about working together?

Describe the storyline of QUEST so far. What do you think will happen in the end?

Thank you for being a partner in your child's learning journey. We look forward to all the growth ahead through QUEST: Apex Academy.
