

WELCOME TO QUEST: STARFORCE

This year, your child will take part in **QUEST: Starforce**, a hands-on learning adventure focused on building human skills that matter in school and life.

Through story-driven lessons playful team challenges, students practice skills like communication, collaboration, curiosity, empathy, and perseverance. Each unit focuses on one skill and gives students the chance to apply it through problem-solving, teamwork, and reflection—all within the imaginative world of Starforce. These skills help children work well with others, express themselves clearly, think critically, and stay motivated even when things get tough.

At times, your child will bring home **Side Questions**—short, optional activities that connect classroom learning to real life. These are not homework, but fun ways to but simple ways to reinforce what your child is learning in class.

You'll receive a brief letter each time a Side Quest is introduced.

At QUEST, we believe:

- Students learn best by doing, not just listening.
- Reflection deepens learning.
- Mistakes are part of growth.
- The best questions don't have simple answers.
- Real-world challenges build real-world skills.

We encourage you to stay curious about your child's QUEST experience. Here are a few questions to start the conversation.

Thank you for being a partner in your child's learning. We're excited for you to see how they grow through QUEST.

Who is your favorite Starforce character? Why?

Which planet did you visit in Starforce today? Tell me about the characters and what happened in the story.

What did you do to help your Starforce team today?
